## ***Foxx-3 Errata***

Due to the continuing change and components becoming obsolete, there may be an alternative component (s) in your kit.

***Stage 2.*** Please check the three (3) transistors before inserting into the PCB, you may/will find one will be either a ***BC212 or BC212L***, these variations have different pin configurations. Identify the BC212 supplied within the kit from the pictures in Fig 1.

Align the legs as shown in the picture below Fig 2. (*Note the BC212 is a direct fit and the BC212L will require re-orientation*):
